1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3, 4 and 7-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 3, "to achieve a predetermined objective" is considered vague and indefinite because one of ordinary skill in the art would not know how to carry out the method; it is unclear what the method actually does. Regarding claim 7, a broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. In the present instance, claim 7 recites the broad recitation "the group consisting of calcium thiosulfate, potassium thiosulfate, sodium thiosulfate, and ammonium thiosulfate", and the claim also recites "calcium thiosulfate" which is the narrower statement of the range/limitation. Claims 4 and 8-15 are rejected because they depend on rejected claim(s).

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagen et al.

See previous Office Action.

5. Claims 8-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter:

Claims 8-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph (i.e. by including a positive step of quenching ozone from water), in light of the declaration submitted September 9, 2003, because the prior art of record fails to teach, disclose, or fairly suggest a method for quenching ozone from water comprising the steps of applying calcium thiosulfate to the water containing ozone.
